

About the vessel

The Mermaid Searcher continues to be one of MMA's most reliable supply, survey and multipurpose support vessels in the fleet. At 53.8m in length, the vessel reaches speeds of up to 11 knots and provides reliable fuel efficiency with its Caterpillar propulsion system.

The Searcher has predominately supported MMA's Australian based clients on the North West Shelf and Carnarvon Basin in Western Australia.

In 2017 the Searcher was deployed to New Zealand on assignment with Western Geco for a multi-client survey scope.
