

## 10 Tonne Clump Weight

Our 10 Tonne Clump Weights are designed for an array of subsea applications. They include a 25 SWI tonne central lifting pad eye and four individual 3.2 tonne VLBS D-rings.

Anchoring

Subsea Positioning

Customisation available

The clumps can also be modified with additional pad eyes and survey buckets if required.

All Subcon anchoring equipment is load tested and provided with certified rigging and lift points.
